But what if I go down there and I'm not any better at being a wizard than I am at bookkeeping? Why can't I do what I know I can do?" Silence shook his head. She had met a wall of air and silence. She touched nothing. He would not hear. Witchery was restricted to women. All magic practiced by women was called "base craft," even when it included practices otherwise called "high arts," such as healing, chanting, changing, etc. Witches were to learn only from one another or from sorcerers. They were forbidden to enter Roke School, and Halkel discouraged wizards from teaching women anything at all. He specifically forbade the teaching of any word of the True Speech to women, and though this proscription was widely ignored, it led in the long run to a profound, long-lasting loss of knowledge and power among the women who practiced magic. The witch emerged with a soapstone drop-spindle and a ball of greasy wool. She sat down on the bench beside her door and set the spindle turning. She had spun a yard of grey-brown yarn before she answered. "Irian of Way," the Summoner said in his deep, clear voice, "that there may be peace and order." "We went farthest east," Azver said. Crafty men used weather as a weapon, sending hail to blight an enemy's crops or a gale to sink his ships; and such storms, freakish and wild, might blow on far past the place they had been sent, troubling harvesters or sailors a hundred miles away. When he saw it, faint and green above the misty sea, he cried out-the men in the ships heard the dragon scream-and flew on faster, leaving them to follow him to the conquest. prove it, he made it seem that a herd of deer ran through the dining hall, followed by a flight of. By the time they were well into the bay and had let down the anchor it was dark, and Ivory said to the ship's master, "I'll go ashore in the morning." To which Silence of course had said nothing, letting him hear what he had said and feel its foolishness thoroughly. The deeds and lays that tell of raids by dragons and counterforays by wizards portray the dragons as pitiless as any wild animal, terrifying, unpredictable, yet intelligent, sometimes wiser than the wizards. Though they speak the True Speech, they are endlessly devious. Some of them clearly enjoy battles

of wits with wizards, "splitting arguments with a forked tongue." Like human beings, all but the greatest of them conceal their true names. In the lay Hasa's Voyage, the dragons appear as formidable but feeling beings, whose anger at the invading human fleet is justified by their love of their own desolate domain. They address the hero: water and never enough to warm a man. The cowboys rode out and tried to round up the animals so. He had not thought. This child was the son of an under-steward in the household of the Lord of Ark. Not a poor man's son, but not a child of much account. And the parents died young. So not much heed was paid to him, until they had to take notice of him because of what he did and could do. He was an uncanny brat, as they say. He had powers. He could light a fire or douse it with a word. He could make pots and pans fly through the air. He could turn a mouse into a pigeon and set it flying round the great kitchens of the Lord of Ark. And if he was crossed, or frightened, then he did harm. He turned a kettle of boiling water over a cook who had mistreated him. Gelluk was sure that without him Losen's rubbishy kingdom would soon collapse and some enemy mage would rub out its king with half a spell. But he let Losen act the master. The pirate was a convenience to the wizard, who had got used to having his wants provided, his time free, and an endless supply of slaves for his needs and experiments. It was easy to keep up the protections he had laid on Losen's person and expeditions and forays, the prisoning spells he had laid on the places slaves worked or treasures were kept. Making those spells had been a different matter, a long hard work. But they were in place now, and there wasn't a wizard in all Havnor who could undo them. personally, was not one she could keep in mind. He was in fact a town boy, born in Gont Port. He had said nothing about himself, but Dulse had asked around a bit. The father, a longshoreman, had died in the big earthquake, when Silence would have been seven or eight; the mother was a cook at a waterfront inn. At twelve the boy had got into some kind of trouble, probably messing about with

magic, and his mother had managed to prentice him to Elassen, a respectable sorcerer in Valmouth. There the boy had picked up his true name, and some skill in carpentry and farmwork, if not much else; and Elassen had had the generosity, after three years, to pay his passage to Roke. That was all Dulse knew about him..Then they were all silent.."The great lode?" Gelluk looked straight at him, their faces not a hand's breadth apart. He did not know himself why he tried to weaken her faith in wizardry; perhaps because any weakening of her strength, her wholeness, was a gain for him. He had begun merely by trying to get her into his bed, a game he loved to play. The game had turned to a kind of contest he had not expected but could not put an end to. He was determined now not to win her, but to defeat her. He could not let her defeat him. He must prove to her and himself that his dreams were meaningless.."She walked with the dead, sometimes," Ayo said very low. "In the forest, down towards Faliern.
