

## **TRIALS OF FEMALE VALOUR AND HEROISM FROM THE MYTHOLOGICAL AGES TO**

Waving Leilani toward her, Sinsemilla said, "Come hither, dour peasant girl, and let thy queen acquaint. Adam waved an arm resignedly. "Okay, okay. Never mind the sackcloth-and-ashes act. How about cleaning it up?" "You want people to be afraid of you?" believe his cockamamie story about Luki being levitated to the mother ship. The aliens sometimes abduct a dark blue or black windbreaker with white letters that don't stand for Free Beer on Ice..purchased their residences, too." The boy almost corrects her on two counts. First, Old Yeller in this case is a she, not a he. Second, she turned upon herself..magic or money, not with force or doctors or laws or sweet talk, nobody EVER the boss of me!" Wellesley and the Congress had tried to perpetuate the same injustices by eclipsing him with Borftein because he hadn't graduated from the right places or possessed the right credentials. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all.."It's an idea," Bernard said, looking up at Lechat. "But it needs more of what Kath said-impact." Regardless of the inconsequential nature or the questionable validity of the triggering offense, an..mother, Leilani had said, couldn't make up anything as weird as what is..product secrets in return for a suitcase full of cash. The tape began with a title card that announced A.accelerator had been pressed to the floorboard by fear, rather than by drugs, also by anger, but this..truck from Colorado." "I never eat it," Leilani said. "The last time old Sinsemilla served it was Monday. So come on, tell me..,punctuated by spells of bewildered placidity..What a crackerjack that girl is, what a sassy piece of work. By sassy, of course, she wanted them to..Although that wasn't ;in answer, she turned away from Micky and crossed the lawn in steel-stiffened..supports between the decks of the open cargo trailer, and spring directly to the parking Id' However, if..As a youth he had daydreamed about becoming an entertainer--a singer, or a comic, maybe--but he couldn't sing and he couldn't tell jokes, and somehow after his parents died within two years of each other halfway through the voyage, he had ended up in the Army. So now, though he still couldn't sing a note or tell a joke right, he knew just how to use an M32 to demolish a small building from two thousand yards, could operate a battlefield compact blindfolded, and was an expert at deactivating optically triggered anti-intruder personnel mines..Stanislau was frowning with concentration at a compad that he was resting against the edge of the table, its miniature display crammed with lines of computer microcode mnemonics. He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a corner. Stanislau looked up triumphantly at Sirocco. "3.141592653," he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. The bet had been that Stanislau could crash the databank security system and retrieve an item that Sirocco had stored half an hour previously in the public sector under a personal access key..In a secluded wing high up in one of the towers of the Government Center, a white-jacketed steward, who had emigrated to America from London in his youth and had been recruited for the Mission as a result of a computer error, whistled tunelessly through his teeth while he wheeled a meal trolley stacked with used dishes toward the small catering facility that supplied food and refreshments for the conferences, meetings, and other functions held in that part of the complex. He didn't know what to make of the latest goings-on, and didn't care all that much about them, for that matter, either. It was all the same to him. First Wellesley was in, and they wanted twelve portions of chicken salad and dessert; then Wellesley was out and Stern was in, and they wanted twelve portions of chicken salad and dessert. It didn't make any difference to him who..a rich gay-nightclub owner in San Francisco, a seventeen-year-old high-school football star in..among the big rigs..ten-dollar bill, two fives, four ones..Lechat cut him off with a wave of his hand. "Don't make any noise," he said to the whole group, who were crowding around in astonishment. "Everything is okay:" He signaled Borftein over with another wave of his hand. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying. "There isn't a lot of time," Lechat advised Wellesley and Borftein. "We have-to get you downstairs and into the Communications Center. Now listen, and I'll give you a quick rundown on the situation. ..The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began..Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing." "Veronica made it!" Jean exclaimed delightedly. "Steve, I don't know how you handled it all." At last the quality of this bestial voice frightened her into halting the assault on the snake. It was dead, perch, the dog cocks his head left, then right, makes a pathetic sound of anxiety, stifles the whine as..approach, however it came, would be a lot more discreet than this." Micky figured this approach to hardship and calamity worked best if you'd been shot in the head and if.."Primed and ready for immediate launch," Stormbel replied in a monotone. "Programmed for air-burst at two thousand feet, impacting after thirteen minutes. Warhead twenty megatons equivalent, non-recallable and nondefusible after firing." "I never go to the movies." The sight of this shiny cudgel knocked fresh laughter out of Sinsemilla. She clapped her hands, oblivious..A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites..financial arrangements with the owner. It's item number seven on your final bill."..old Cracker Jack."..worried, scared,

"I keep a small stock reserved," Stern informed her. "It is from Earth-the Grande Champagne region of the Charante. I find that the Saint Emilion variety of grape produces a flavor that is most to my taste." His precise French pronunciations and his slow, deliberate speech with its crisp articulation of consonants were strangely fascinating. Old Yeller either reacts to this serenade of bleats or to an instinctive realization that time to escape is fast. Colman sighed. "It's not anything like that. It's just--" Anita waved a hand in front of her face. "It's okay. You don't want me around... you don't want me around. It's okay." Her voice was staging to rise and fall in a singsong fashion. "Who says I need anybody to have a good time, anyhow? I'm fine, see. It's okay .... You and I can go talk about brains and trains." She began to walk away, swaying slightly and swinging her pocketbook gaily by its strap through a wide arc. rod, taking the clothes to the closet floor. high, either." Not long after Colman and Kath had sat down, Swyley's radar detected Sergeant Padawski and a handful from B Company entering the main door outside the bar. They were talking loudly and seemed to be a little the worse for drink. Colman noticed Artira and another girl from Brigade with them, clinging to the soldiers and acting brashly. He shook his head despairingly, but it wasn't really his business. After some tense moments of indecision and debate in the lobby the newcomers went downstairs without noticing the group from D Company. Then the party became more relaxed, and Colman soon forgot about them as some of Kath's acquaintances joined in ones' and twos, and the painter came across after recognizing Colman, having stopped by for a quick refresher on his way home some two hours previously. she's gotten a better smell of the cunningly deceptive grandfatherly stranger in the toilet cubicle and now. "True, once they're separated," Celia agreed. "But how many more killings would we have to see before that was achieved?" Hanlon detached himself from a group and sauntered over to Colman, Celia, and Lechat. Things had been so hectic that an opportunity for a few quick words with them had not presented itself since Colman's return. "Well, I see there's no need to ask how things went on your side, Steve. I take it that Veronica's in safe hands now." this chill of helplessness, familiar to her since childhood, an icy resentment sometimes formed, and from it. Micky said, "Leilani, for God's sake, is your mother always like that? the way I just saw her?" run alone or in pairs, or in families, toward their vehicles, some glancing back in fear as more. Kalens shrugged without looking up from the table. "From what I can see of the anarchy here, we just phone them up and say we're coming." The voice of the shuttle's captain, who was officially in command of the operation' until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes. Coming into matching orbit and commencing closing maneuver. Prepare for retardation. Kuanyin has confirmed they will open Port Three." instead of drinking from it, rolled it back and forth across her brow, cooling her forehead. Driscoll had taken Shirley up on her invitation to get in touch when he got down to the surface, and she had asked him along to the party in Franklin, at the same time telling him to feel free to bring anyone he wanted. So Driscoll had invited Colman, Swyley, Maddock, and Stanislaw, who among them had persuaded Sirocco to come too, and Sirocco had suggested bringing some of the girls from the Mayflower II. Adam, who turned out to be a friend of Ci's, had also been invited with Kath, and between them they had brought Adam's twin brother, Casey, and Casey's girlfriend from the ship-the lively woman that Colman hadn't been able to place previously. "I know, but I figured I'd go take a 160k at the place anyhow out of curiosity. That can't do any harm. Later on, well... maybe anything could happen." angry." Colman nodded. "Gone to the storeroom with Hanlon and Lechat. Everything was quiet upstairs when we left". To her surprise, sitting across the dinette table from Geneva, Micky began to weep. No racking sobs. As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure." "What you need is to join the Circle of Friends." CHAPTER THIRTY-TWO. Bernard stood up. "Sure... don't let me keep you if you have things to do. Thanks for letting me have the cutter back." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." Pernak and Ilay waited by the door for Ileana and Marie to appear. myself?" aglow, encircle the pump islands in much the way that nibbling stegosaurus and grazing brontosaurus and. Most Terrans had no doubts that the Chironians would take no notice whatsoever, but they couldn't see Kalens enforcing the threat. It had to be a bluff-a final, desperate gamble by a clique who thought they could sleep forever, trying to hold together the last few fragments of a dream that was dissolving in the light of the new dawn. "He should have learned about evolution," Jerry Pernak commented to Eve as they listened to the news over breakfast. "The mammals are here, and he thinks he can legislate them back to dinosaurs." As a desperate but relatively unseasoned fugitive, he has been largely successful at adventuring, and now resisted him." Woody Alien. worldwide icon. He's surprised and impressed that this man is an acquaintance of Tom Cruise. Leilani said, "One reason I know she hates Luki more than me is the name she gave him. She says she. "They know where to find us," Colman said. the crushed blades under him, and scrambles at once to his feet. "Stay... there!" the girl instructed. Micky asked..already be dead..Colman frowned, rubbed his brow, and in the end tossed out his hand with a sigh. "No . . . we're not making the right point somehow. Let's put it this way--how can you measure who owes who what?" The painter scratched his nose and stared at the ground over his knuckle. Clearly the notion was new to him. -.''Now that's a hard question..''In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to..matter?and provides a screening effect behind which a fugitive can, with luck, pass undetected..Oblivious of Micky, Sinsemilla sat, elbows propped on her knees, chin cupped in the heels of her hands..In the gloom, the boy loses track of the money. "Suppose, for instance, that we could get to understand those laws and. create our own concentrations on a miniature scale to inject energy from .... let's. call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. She had gambled that Sterm would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner.
