Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured.. Bernard gaped at her as the enormity of what she was saying suddenly dawned on him. Kath's expression 'was grave, but nevertheless there was a hint of mirth dancing at the back of her eyes. "We could hardly disguise our scientific work," she said. "It had to be seen to serve some legitimate purpose, and an antimatter drive seemed suitable. She could think of no way to rescue Leilani, just as she had never been able. Celia's suggestion for including Borftein and Wellesley was still undeniably attractive, but none of the ideas advanced for freeing them had stood up to close analysis because the prisoners were being held in rooms guarded constantly by two armed and alert SD's stationed halfway along a wide, brightly lit corridor with no way to approach them before they would be able to raise the alarm. Sirocco had therefore left that side of things in abeyance for the time being.. "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay..". The first time that he'd worked for Noah, the kid had delivered a handsomely shot and effectively edited. It was time to begin mobilizing the potential allies he had been quietly sounding out and cultivating for the three years since the last decisions. He replaced the Korean porcelain carefully in its recess among the bookshelves and walked through the lounge to the patio, where Celia was sitting in a recliner with a portable compad on her lap, composing a note to one of her friends.. the police.. "Yes, but that situation can't last. If the Army doesn't get them soon, the Chironians will..". Into the meadow now, without further delay, risking dangers unknown but surely countless. A ripe. Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody

else hasn't come out yet. I think the Chironians believe that too." Colman found himself facing a big man wielding a baseball bat, his face twisted and ugly, mirroring the mindlessness that had taken possession of the rioters. The man swung the bat viciously but clumsily. Colman rode the blow easily with his shield and jabbed with the tip of his baton at the kidney area exposed below the ribcage. His assailant staggered back with a scream of pain. Shouts, profanities, and the sounds of bodies clashing rose all around Colman. Something hard bounced off his helmet. Two youths rushed him from different directions, one waving a stick, the other a chain. Colman jumped to the side to bring the two in line for a split second's cover, fainted with his baton, then sent the first cannoning into the second with a shove from his shield with the full weight of his shoulder behind it, and both rioters went down into a heap. Colman glimpsed something hitting Young in the side of the face, but two grappling figures momentarily obscured his view, and then Young was lying on the ground. As a fat youth swung his foot for a kick, Colman dropped him with a blow to the head. When bloodcurdling yells and the sound of running feet heralded the arrival of the SDs, the mob raggedly fled around the corner, and it was all over. Suddenly, from the outer entrance to the foyer behind Hanlon, a firm, authoritative voice ordered, "Stop that!" The sergeant looked up from the panel just as he was about to place the call, and his jaw dropped open in astonishment. Borftein was striding forward toward the desk with Wellesley on one side of him, Lechat on the other, and a squad of soldiers in tight formation bringing up the rear. Celia and Malloy were between them. The two SD guards glanced uncertainly at each other. "And Alec Baldwin," Micky assured Leilani, "wasn't the man who held up Aunt Gen's store." "providing us with all we need and for giving us the grace to be satisfied with what we have." He's scared, mouth suddenly bitter with the taste of what might be his mortality, lungs cinched tight. "But there is no specifically defined right for the Director to extend that privilege to his successor," Fulmire replied. "You cannot attempt to extract any form of assurance from me concerning the possible resolution of such a question. My presuming the right to give any such assurance would be highly illegal, as would be any consequential actions that you might take. I repeat, I have no more to say." Lechat picked up his fork again. "I never looked at it in quite that way. It's an interesting thought." He began eating again, then stopped and looked up. "I suppose that was how the first generation of them sought to gain individual recognition at the beginning ... when machines did all the work and our traditional ideas of wealth had no meaning. And it's become embedded in their basic thinking." He nodded slowly to himself and reflected further. "A completely different kind of conditioning, absorbed from the earliest years... based on recognizing individual attributes. That would explain the apparent absence of any group prejudices too, wouldn't it? They've never had any reason to feel threatened by other groups." Backlit by the westerling sun, wearing khaki shorts and a white T-shirt with a small green heart. with any analytic passion? why he felt obliged to slander himself. "Just shut up and keep still, and you won't get hurt", he murmured without moving his eye from the edge of the almost-closed door. "We're just passing through". After a short silence Sirocco tensed suddenly. "Here they come. . . just two of them with a sergeant," he whispered. "Get ready. There are two guys talking by the coffee dispenser. We'll have to grab them too. Faustzman, you take care of them." The others readied themselves behind him, leaving one to watch the three people on the floor. Outside in the passageway, the SD detail on its way to relieve the security guards at the tear lobby was almost abreast of the door. "So maybe we'll see you down there sometime," Ci said. CHAPTER THIRTY FIVE. "She's on the payroll of your husband's charitable foundation." DRIVING MACHINE in yellow letters above the bill? not the customer who was at the cash register. "Thank you," Merrick said, pouncing on the opportunity to conclude. "I agree with and endorse your assessment. Very good, Fallows. Enjoy your leave." Merrick turned to one side and began tapping something into the touchboard below the screens. "I've heard about you." It could only have been from the Chironians he had talked with earlier. Why would they mention his name to her? Who was she? She came nearer and smiled. "My name is Kath. I have some connection with the technical aspects of what goes on here. From what I've heard, I'd imagine you'd find this an interesting place. Perhaps when you've some free time, you'd like to meet some of the people here. If you like, I could mention it to them." "You'd have made a fine Minnie." to her that acting silly-kid excited about them would help convince Dr. Doom that she continued to killing people because I'm too fearful or too ashamed to bring myself to talk about what he really does. In its natural condition a society was like an iceberg, eight-ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn. Jay and Marie were her latest weapons. Bernard knew she was rationalizing her own fears of the changes involved, but he wasn't going to make a public issue of it. "I'd like them to have the chance to Make the best lives for themselves that they can, sure. They've got that chance right here. We don't have to go halfway round the planet to recreate part of a world we don't belong to anymore. It couldn't last. That's all over now. You have to bring yourself to face up to it, hon." "I never travel." Distance to Chiron 1.9 billion miles; speed down to 1100 miles per second. Progressive phase-down of the main-drive bum was commenced, and slow pivoting of the variable-attitude Ring modules initiated to correct for the effect of diminishing linear force from the~ reducing deceleration. No response received from the Chironians to a request for a schedule of the names, ranks, titles, and responsibilities of the planetary dignitaries assigned to receive the Mayflower II's official delegation on

arrival.. "What are all the changes around the back end?" Colman asked curiously. "It looks like a whole new drive system." A lopsided smile tugged at the right corner of the girl's mouth, and unmistakable merriment enlivened her. She saw more in Micky's face than she cared to see. She switched on the light above the sink, returning. Micky wasn't Sinsemilla, after all. Micky. "They listen to kids," Geneva advised.. "It's not subject to finite arithmetic," Pernak agreed. "But why does it have to be? Our ideas of currency are based on its being backed by a finite standard because that's all we've ever known. The gold-standard behind the Chironians' currency is the power of their minds, which they consider to be an infinite resource. Therefore they do their accounting with a calculus of infinities. You take something from infinity, and you've still got infinity left." He shrugged. "It's consistent. I know it sounds crazy to us, but it fits with the way they think". "But that ridiculous! What's to stop anyone walking in off the street from giving orders?". By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Sterm would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to do anything.. "A dinner guest?". Borftein licked his ups and thought frantically. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Sterm, closed his eyes for a moment, and then raised a hand and shook his head. Sterm looked at him questioningly. "I m not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table.. mistaken for the rhythmic susurrations of the sea.. And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction.. Although Jean felt sympathy for the soldier, the course that Kalens seemed to be advocating, with its prospect of more trouble and, inevitably, more killing, worried her even more. Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her--as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. So why should other people's squabbles which were not of her making now threaten her with sweeping it all away?. "She's coming down to the surface later this evening to pick up some papers and things from the house after it's dark. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think."."Stay off the streets and keep out of sight," Fulmire said. "Sterm and Stormbel have pulled a coup.
