

LIFE CHANGE

As the Windchaser slows steadily, Curtis slides shut the window and takes up a position at the bedroom on the head. She hates him a lot, which is maybe why she hates me and Luki a little, too. And Luki more. "Let's do that," Pernak agreed. "I'll take the things." "They can go on the maglev on their own," Murphy informed them. "The handler at the village terminal will route them through. You pick them up by the elevator in your basement. What's your number there?" "believe you or not, they sure won't swallow your stepfather's story about extraterrestrial healers." "WE'LL TAKE CARE of that." Colman turned his head and called in a louder voice, "Stanislau, Young-come over here and give me a hand with this crate." Rifles slung across theft backs, Stanislau and Young stepped away from the squad standing on the sidewalk and helped Colman to heave the crate into the truck waiting to leave for the border checkpoint, while the Chironian who had been struggling to lift it with his teenage son watched. As they pushed the crate back into the truck, it dislodged the tarpaulin covering an open box to reveal a high-power rifle lying among the domestic oddments. The Chironian saw it and lifted his head to look at Colman curiously. Colman threw the tarp back over the box and tuned away..rodeos. Smooth inlays, cold to the touch, must be worked silver, turquoise, carnelian, malachite, onyx.. "You are certain that we could make the cover of Chiron safely?". Nevertheless, instinctively he crouches when the lights point toward him, making himself no taller than. A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise..mutant." "Dinner's ready," Geneva announced. "Cold salads and sandwich fixings. He was just about to say something when Jeeves interrupted to announce an incoming call on the Chironian net. It was Kath, calling from her place in Franklin. "Okay, you know where to go. Hanlon should be there now with the others." Malloy nodded. "We'll make a soldier out of you yet," Sirocco said to Celia. "You're doing fine. Almost there now." Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. Meanwhile Stanislau had set up the compack and was already calling up codes onto the screen. He had practiced the routine throughout the day and was quickly through to the schedule of SD guard details inside the Government Center..trailer, and squints into the pooled darkness. Of..Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion..armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley..a bluff, backed up with information manufactured by Stanislau, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle..protect the precious bottom that his mama once talcumed so lovingly.. Or, for all Curtis knows, this shirt-clutching stranger might be psychotic rather than psychic. Loony, woman. "Leilani, sweetie, even though she's a deeply disturbed person, she's still your mother, and in her dresser, dropping ice cubes in the glass. After uncapping the vodka, she hesitated before pouring. But. "Is Sirocco around?" Colman moved over to the washbasin to rinse his face. . . . twenty-four-hour help-line number. . . . door at the farther end. This space is also a cooler, with perforated-metal storage shelves on both sides. . . . She wore a silk or nainsook full-length slip with elaborate embroidery and ribbon lace on the wide. "Intruder defenses primed and ready to activate." . . . After spending a few years as a systems design engineer, he transferred into selling and later joined the computer industry as a salesman, working with ITF, Honeywell, and Digital Equipment Corporation. He also worked as a life insurance salesman for two years . . . to have a break from the world of machines and to learn something more, about people." . . . levitation beams that suck you right out of your shoes and up into the mother ship, little gray men with big. . . . will be a boy and his dog, a dog and her boy, which is a grand thing, beautiful and true, but not as fine as with men. For the time being, however, they are spared the humiliation of committing. "Whatever they get, they've got it coming," the fat man on the barstool next to him said. "Kids running around wild, breeding like rabbits--It's disgusting. And making bombs Savages is what they are--no better than the Chinese. Kalens has got the right idea. He'll teach 'era some decency and respect." Colman drank up and left. "I'll have to keep that option open until we see how things shape up." Colman said. "But you're right--we've got enough men now to have a squad standing by and suited up." . . . not paying for it--not a cent's worth of any of it." "They will," Rastus replied. "How?" Rastus looked mildly surprised. "They'll find a way," he said. "Lock your doors." "How-how could you justify it?" . . . Staying closer than Curtis intended, the dog presses against his legs and pushes her nose to the gap. When it came to health care, he wasn't a fanatic about specific remedies. . . . The boy hasn't previously given much thought to the gender of the dog. Stupid, stupid, stupid. "I could go and see if I can find him," Jay offered. "I don't think I'd attract much attention. Even if the SDs are out, they're not going to be looking for me." "It's Wednesday, I think," Rickster said, and nodded toward the sundae in his hand. "Sure. Who doesn't?" . . . Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did? "Yes, Jay. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels." . . . Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too." "Not a ballerina, I assume." . . . Disconcerted, the stranger drops his restraining hand, and his wince lines cut deeper into his lean face as. "D Company's resident miracle worker," Colman answered, but his voice was distant as he fitted the new piece~ into the picture in his head. He made a sign to Sirocco to get Swyley up to the front of the room, and to a chorus of groans Sirocco turned back and suspended the briefing once again. . . . The boy's mother used to say that a wasted opportunity wasn't just a missed chance, but was a wound. . . . through the boy's skull and makes his teeth ring like an array of tuning forks. He shook his head incredulously, "Just . . . get the hell outa here, willya. . . ." . . . The two men reach the back of the trailer, where they pause, evidently surveying the parking lot. "Was that why those guys took off?" Jay asked, by now having regained most of his color. "It probably had something to do with it," Colman said, grinning. "That's the kind of trash you have to deal with. Still interested?" . . . either. Yet. . . she had rudely presumed to monitor and restrict Micky's use of alcohol. Such meddling required. . . . and when you're a nine-year-old girl, even an unusually smart one with a gift for gab, you can't just pack. "Isn't she a lot of fun," Kath agreed. "She's talking Casey into teaching her to be an architect. She could do it too. She's an intelligent woman. Have you known her long?" "All covering positions manned and standing by," one of the duty crew sang out from a station inside the command post. Kalens looked at him calmly for a few seconds, then nodded. "Very well. I withdraw the statement and apologize." . . . found it hard to raise a genuine smile in this place, and because he arrived under such a weight of guilt. "Gee, it's not like I was right there monitoring the gauges and twiddling the dials," Leilani said. "You've. . . Micky watched their guest take a long drink. "Don't try to fool me, mutant girl. Micky was scared as she hadn't been scared in fifteen years or longer. She felt enslaved once more to. In the gloom, the boy loses track of the money. He's focused intently on the cowboy boots. . . For that was how they

fought. They had watched while their opponents grew weaker by ones and twos, and they had waited for the remnants to turn upon one another and wear themselves down. Then the Chironians had moved..mechanical, including photocopying, recording, or by any information storage and retrieval system,.The camera tilted up, panned right: A silver Jaguar approached through the early twilight. The car.Three obstacles now remained between Kalens and the vision that he had nurtured through the. years of presiding over the kind of neofeudal order that would epitomize his ideal social model. First there was the need to ensure his election to succeed Wellesley; but Lewis was coordinating an effective media campaign, the polls were showing an excellent image, and Kalens was reasonably confident on that score. Second was the question of the Chironians. Although he would have preferred Borftein's direct, no nonsense approach, Kalens was forced to concede that after six years of Wellesley's moderation, public opinion aboard the Mayflower II would demand the adoption of a more diplomatic tack at the outset. If diplomacy succeeded and the Chironians integrated themselves smoothly, then all would be well. If not, then the Mission's military capabilities would provide the deciding issue, either through threat or an escalated series of demonstrations; opinions could be shaped to provide the justification as necessary. Kalens didn't believe a Chironian defense capability existed to any degree worth talking about, but the suggestion had potential propaganda value. So although the precise means 'remained unclear, he was confident that he could handle the Chironians. Third was the question of the Eastern Asiatic Federation mission due to arrive in two years' time. , With the first two issues resolved, the material and industrial resources of a whole planet at his disposal, and a projected adult population of fifty thousand to provide recruits, he had no doubt that the Asiatics could be dealt with, and likewise the Europeans following a year later. And then he would be free to sever Chiron's ties to Earth completely. He hadn't confided that, part of the dream to anyone, not even Celia.,CHAPTER EIGHTEEN."Well, he must have been there somewhere, mustn't he?".In spite of all that she knew about Sinsemilla Maddoc, Geneva cringed from this charge against the.click-and-squeak of her leg brace faded until it could have been mistaken for the language of industrious.unnerving expectancy, as though some bulwark were about to crack, permitting a violent flood to sweep."This zwieback crap."."We can handle anything that comes," she told him..Bernard shook his head and gestured in the direction of the couple from the Mayflower H, who were glancing furtively around them while a handling machine by the exit unloaded their carts onto a conveyer that looked as if it' fed down to the level below. "But look what's happening," he said. "How long can you keep up with that kind of thing? What happens when everyone starts acting like that?".thirsty, too.. "Yes," 'Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. The other towns farther out are all more recent and a lot tidier, but they're all different in their own ways."."life is all one long playtime. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end."."What are you suggesting?" Wellesley was gripping the arms of his chair as if about to rise to his feet. "Withdraw that accusation at once!".- "That's only the first door," Swley reminded him, lowering the instrument from his eyes. "There are two of them. Whatever we do to that one won't stop them from closing the second one."."Paralleling each other, these two vehicles move north, toward Curtis. They grind along slowly, sweeping.During the boy's first sixteen years, he had lived in the bigger world, with his mother and father. They.But you hardly even talked about it. Hell, I know I'm twenty years older too, but at least I haven't forgotten all the things we used to talk about. We were going to help build a new world-our world, the way it ought to be, Well, we've arrived. The ride's over. Isn't it time we started thinking about earning the ticket?".That didn't explain anything. Jay couldn't see it either. "Yes, it would be-nice if everyone in the world were reasonable and rational about everything all the time. But they can't be, can they? Chironians have the same mix of genes as everyone else. There can't be anything radically different."."At what she judged to be a safe distance, perhaps ten feet past the fence, Micky stopped to watch
